DR. MACROBIN, . . .	<i>Consulting Physician.</i>
REV. ALEX. FERGUSON, .	<i>Chaplain.</i>
WILLIAM CARNIE, . . .	<i>Clerk and Treasurer.</i>

## MEDICAL REPORT.

---

AT the commencement of the year 1870, there were four hundred and thirty-one (431) patients resident in the Aberdeen Lunatic Asylum, of whom one hundred and ninety-four (194) were males, and two hundred and thirty-seven (237) were females.

During the year, sixty-nine (69) males were admitted, and eighty-one (81) females, making an addition of one hundred and fifty (150) persons, and a grand total of five hundred and eighty-one (581).

Of these, one hundred and ninety-one (191) were private patients, and three hundred and ninety (390) were sent into the Asylum by the parishes belonging to the County, with one or two exceptions.

During the year twenty-six (26) patients died, a hundred and nineteen (119) were removed in various conditions, about 57 per cent. of them being so far recovered as to justify their liberation, and to allow most of them to return to their occupations; and at the end of December, 1870, four hundred and thirty-six (436) patients remained in the Establishment.

The increase of inmates during the period reported upon was but slight, and took place on the number of private patients.

Twenty-one incurables were removed to the Fatuous Wards of Poor-houses, being mostly those on

whom the Establishment could be thought to have much or any profit; the noisy, the extremely feeble, the sickly, the turbulent, the destructive, and all requiring much expense or care being left behind, a circumstance very much calling for the consideration of the Managers in relation to reductions made some years ago in the charge fixed for Parochial Lunatics. In reference to this matter, there is appended to the Report a Letter recently laid before the Managing Committee.

The condition of the Hospital, so far as it is capable of being deemed financially a thriving one, will be found to be due to the large proportion of private patients which it receives, which is probably as large as that of any other Asylum of a mixed character undertaking to discharge the duties of a District Hospital, and also to the great attention given to its economical administration by the Visiting Committee of Management. The good results should undoubtedly be made to tell to the advantage of Parochial Boards, and not less to the advantage of the Hospital and its inmates.

The usual medical statistics are added to the Report, and will, it is believed, be found on examination to present pretty much the average results. These have been always considered, by those entitled or competent to criticise them, to be of a creditable sort; and it will be observed, on investigation, that during the long period of the Asylum's history, the standard of recoveries and the ratio of mortality have both been advanced in the right directions.

In such an Institution many things that are not desirable will continue to occur, and in something like average number, as if they were not preventible by possible foresight or ordinary practicable care, and accordingly the year did not pass by without its contribution of annoying occurrences. Several cases of Scarlet Fever made their appearance during the month of July on the east side of the house. One escape was effected by a patient while travelling under the guardianship of an Attendant; and various other attempts were partially successful, putting the Hospital to some expense and friends to no little anxiety. A patient in a depressed and weakly condition, bent on committing suicide by starvation, died when being fed by hand. One Attendant was discharged for rough usage to a patient, and another for habits rendering him unsuitable for the discharge of night duty; although it is but justice to the staff of Attendants, both male and female, to state, that as a body they have very creditably discharged difficult, harassing, and dangerous duties.

A pressure of female cases had rendered an enlargement of the house necessary, and accordingly an extension of the east wing was determined upon by the Managers, which, with certain re-arrangements of that side of the Hospital, will effect a considerable increase of accommodation, and be, while in harmony with connected buildings, it is believed, an improvement upon them in various important particulars.

ROBERT JAMIESON, M.D.

# TABLES.

## TABLE I.

GENERAL RESULTS OF THE YEAR.

	Males.	Females.	Total.
Patients in Asylum, 1st January, 1870, . . . . .	194	237	431
Admitted during the year, . . . . .	69	81	150
Under care and treatment during the year, . . . . .	263	318	581
Removed during the year :—			
Recovered, . . . . .	30	38	68
Relieved, . . . . .	7	16	23
Unimproved, . . . . .	15	9	24
On Probation, . . . . .	0	4	4
Dead, . . . . .	12	14	26
Remaining in Asylum, 31st Dec., 1870, . . . . .	199	237	436

## TABLE II.

RELATIVE NUMBER OF PRIVATE AND PAROCHIAL CASES.

## A P P E N D I X .

Royal Lunatic Asylum,

ABERDEEN, 13th July, 1870.

*To the COMMITTEE of MANAGEMENT  
of the ROYAL LUNATIC ASYLUM.*

GENTLEMEN,

I beg to call to your remembrance a Committee appointed to review the Finances of the Asylum, which gave in its report on the 8th March, 1869 ; because, although it represented that the income arising from the board of patients was then too low for the well-being of the establishment, as yet, no steps have been taken by the Managers to remedy the matter.

I have myself been for years persuaded that the charge made for some classes of patients, and particularly for our paupers, is much under what it ought to be, and that the Managers in adhering to present rates, and that too, under altered circumstances, are inconsiderately sacrificing the interests of the Asylum to the pressure of the Parochial Boards of Aberdeenshire, more especially of the Parishes of the Town, which are never without Members of their Boards on the Asylum Committee of Management. The agreement which had been entered into, about eleven years ago, as to the amount of payment to be made for individuals sent by the Aberdeenshire Parishes to the Asylum, had scarcely been in operation, when a reduction was injudiciously allowed, and in this way the balance in favour of the Hospital, necessary for repairs, extensions, accidental occurrences, requiring outlay, and for the gradual extinction of debt—was given up to a cry raised about the supposed high scale of charges. After one reduction was submitted to, another was urged and made ; and while the household expense was certainly not declining, the most legitimate source of the Asylum's income was gradually being diminished, and all the results of care and economy of management made to tend, not to the credit, but to the disadvantage of the Institution.

The charge for paupers was held up by those, more zealous in the popular cause of the reduction of rates, than considerate for the good of the Asylum, as being beyond what was requisite in itself, or countenanced by the scale of charges elsewhere. The average cost of patients in the Aberdeen Asylum—of whom the great bulk are parochial or indigent cases—is £27 upwards; while the amount paid for every furnishing for pauper lunatics, even of the most refractory and expensive kind, is but £23 10s.—although the charge even for District Paupers in Scotch Asylums has at the same period reached in some so high as £32, which very recently, and it may be so now, was charged for Inverness-shire patients in the county Asylum at Inverness. (*Vide Lunacy Commissioners' Parliamentary Report for 1869, p. xxxii.*)

There is no reason for the Aberdeen Asylum undercharging for Pauper Lunatics, but various reasons why it might charge more than some others. It was not built by a rate, nor is it upheld by any tax on the community. It is neither richly endowed, nor highly encouraged by benevolent contributions. It is self-supporting, and until interfered with by the pressure externally of Lunacy Boards and Parochial interests, was successfully so, in a considerable degree. By its ready admission to all classes, moderate charges for board, and administration of certain small charitable funds connected with it, it helps undoubtedly to lessen the number of cases that might otherwise come upon the parish. The Aberdeen Asylum by its existence, and readiness to undertake the work of a District Hospital, saved the County the burden of building and maintaining an Hospital for three hundred Lunatics. In order to fully accommodate the County and the Town Parishes, the Asylum discharged many patients, whom their guardians would gladly have left in its care, at even an advanced scale of rates. Various Counties would, some years ago, have been very willing to have come to arrangements sufficiently profitable to the establishment for the admission of their patients, and probably some of the recently-erected Asylums might not, in such a case, have been in existence. Besides foregoing opportunities of obtaining large boards from distant places, the Aberdeen Asylum has within the last twelve years, been at a great expense in enlarging its grounds and improving its accommodation, for the purpose of acquiring and retaining the sanction of authority to its assuming the position and discharging the function of a District Lunatic Asylum. For such and similar reasons, it is unfair but that the Hospital should be adequately remunerated, and not underpaid, as it is, for District Paupers.

The present rate of board is under what was paid as a fair thing, after much consideration, ten years ago, when it was the declared intention of legislation that all the Pauper Lunatics of the District should be kept in the District Asylum. Since then much loss has resulted, after the expenditure which the Managers were thus led into, from subsequent alterations on the original Act of 1857, and the removal of Patients from the Asylum, to the fatuous wards of Poor houses. During a period of twelve months past about sixty persons have been so transferred, that is the Asylum suffers a loss nearly equivalent to £1500 per annum. The Town Poor-houses are gradually becoming Asylums, and if the movement goes on in its present current, may in a few years be licenced as such. Those patients, who are cheaply or easily accommodated, or who, by their more tractable character and domestic usefulness, help to balance the expense of keeping the more infirm and more dangerous classes, are now removed by the Parochial authorities, and only such left as cost the house considerably more than the contract charge, in care and medical treatment.

The Institution is in a bad way financially, I conceive, unless its annual income for some years to come exceeds its expenditure by a sum not less than £2000. The burdens upon it are heavy, and the house, by age and condition, of a kind to require an annual outlay in repairs, independently of the necessity for development, in the way of improvement, or possible extension. The income cannot be increased but by a rise on the boards charged, for I scarcely see how much can be effected by any practical increase of economy; and the relation of the Hospital to the Infirmary nearly deprives it of the chances which similar institutions enjoy of being bettered by legacies, donations, and payments for right of management. This proposed rise on boards would be quite inadequate if limited to the amounts charged for private patients, unless this class was much more extended than it is at present, or likely in future to become. The advance must be made on the reduced rate at which Parochial cases are received, by recurring to the charge which was originally agreed to for County patients. A consideration of circumstances will show such an advance to be both just and feasible. Many of the Aberdeenshire Parishes have been withdrawing a number of those whose keep, under bargain made, was to have contributed permanently to the income of the Institution: and recent changes in the Statute give them (the Parochial authorities) the power of removing any patients deemed incurable and not dangerous,

to be more cheaply kept elsewhere. The required increase on the charge for those allowed to remain may be safely gone into, without detriment to the Asylum, as the District Aberdeenshire Lunatics cannot find admission into any other public Asylum, for want of room, and, if they could, only at an expense which, in connection with delay, travelling charges in receiving and removing, and various other inconveniences, would make any charge, such as would be contemplated as necessary here, appear in reality but a reasonable and moderate one.

I am,

GENTLEMEN,

Your obedient Servant,

ROBERT JAMIESON,  
*Medical Superintendent.*

---

NOTE.—The following Charges made for Pauper Lunatics, in the Scottish Asylums, are extracted from the Eleventh and Twelfth Parliamentary Reports of the Commissioners in Lunacy :—

			1869.	1870.
Inverness District Asylum ,	.	.	£32 0 0	£28 0 0
Glasgow Royal	do.	.	31 12 8	31 12 8
Edinburgh do.	do.	.	27 0 0	27 0 0
Argyll District	do.	.	25 2 8	25 2 8
Haddington do.	do.	.	25 0 0	25 0 0
Fife	do.	do.	24 0 0	24 0 0
Ayr	do.	do.	.....	26 0 0
Banff	do.	do.	.....	26 0 0
Montrose Royal	do.	.	23 10 0	23 10 0
Aberdeen do.	do.	.	23 10 0	23 10 0

And except Perth Asylum, which charges Ten Shillings less, and Dundee Asylum, which charges only Two Shillings less, there are none lower but Elgin and Dumfries Asylums.
